National Institute of Technology Raipur
B.Tech Computer Science and Engineering
Sri Chaitanya Jr. College, Vijayawada
MPC, Class XII

2022–2026
Current CGPA: 8.51/10.0
2020–2022
Aggregate: 97.7%

WORK EXPERIENCE

Myntra Designs Pvt. Ltd. (Flipkart Group) *On-site, Bangalore, India*
Role: Software Development Engineer Intern Jan 2026 – Jun 2026

- Cut PBS manual testing **70%** (days to **~5 min**) via MTest, automating **300–400 tests** across **5 microservices**; also fixed margin-check bugs via IBIS validation, preventing PO failures.
- Increased logging throughput by 12× and decreased request latency up to **10%** across **7 services** by migrating Log4j2 with a custom LMAX Disruptor ring buffer (**~7K logs/sec**).
- Minimized incident-detection time by **80%** (30 min to 5 min) and reduced on-call escalations by **40%** by creating unified Grafana/Prometheus dashboards for **~20 external APIs**.
- Cut cache latency **90–95%** by migrating IBIS/Hydra to in-memory cache; extended with a Bash script for parallel Redis key deletion, cutting cleanup time to under 1 min (**~95% faster**).
- Accelerated delivery of all **8 shipped features** by adopting spec-driven development with agentic AI (GitHub Spec-Kit) for reviewed implementations.
- **Skills Used:** Java, Spring Boot, Log4j2, Kafka, Redis, Grafana, Prometheus, MongoDB, SQL, Bash, Elasticsearch

Handshake – Project Dynamo (Freelance) *Remote, San Francisco, CA*
Role: AI Evaluation Specialist Jul 2026 – Aug 2026

- Developed **10+** terminal-based debugging, repository-repair, and multi-step scenarios to assess AI agents' reasoning and code-execution beyond basic generation.
- Evaluated **20+** AI failure patterns and provided structured feedback to enhance the quality, fairness, and robustness of software-engineering benchmark tasks.
- Refined task design through multiple review cycles, addressing verifier, instruction clarity, and difficulty issues to elevate benchmark acceptance readiness.
- **Skills Used:** GitHub CLI, Git, Docker, Python, UV

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL, Bash
Frameworks & Libraries: Spring Boot, Node.js, Express.js, REST APIs, JWT, Hibernate/JPA
Databases: MongoDB, PostgreSQL, MySQL, Redis, Kafka
Tools & Platforms: Docker, Kubernetes, Grafana, Prometheus, Elasticsearch, Git, GitHub, CI/CD, IntelliJ IDEA, VS Code
Soft Skills: Problem Solving, Teamwork, Critical Thinking, Ownership
Spoken Languages: English, Hindi, Telugu

AWARDS & ACHIEVEMENTS

- **Amazon ML Summer School Participant (Top 3%)** — trained in ML, deep learning, LLMs, fine-tuning, and model optimization by Amazon Applied Scientists.
- Solved **1,500+ problems** across LeetCode, CodeChef, and Codeforces.
- **LeetCode:** Top 5%, max rating 1854, Knight badge; Global Rank 1425 in Biweekly Contest 158.
- **CodeChef:** 3-Star, max rating 1646; Global Ranks 433 & 300 in Starters 129, 153.
- **Codeforces:** Max rating 1320 (Pupil).

PROJECTS

OEguard *GitHub*
AI Engineer – Computer Vision & Agentic AI Jun 2026 – Jul 2026

- Developed an AI child screen-time guardian that detects prolonged staring, issues personalized warnings, locks screens after resistance, and alerts parents.
- Enhanced the computer-vision pipeline performance from **~1 FPS** to **10–15 FPS** through adaptive EAR blink detection, rolling-window analysis, and anti-cheat mechanisms.
- Created a safety-constrained multi-agent system with incident memory, offline fallback, deduplication logic, and **111 automated Pytest cases** for reliability.
- **Tech Stack:** Python, OpenCV, MediaPipe, Gemini API, RAG, ChromaDB, Telegram Bot API, Pytest, Git

CodeOrbit *Website* *GitHub*
Full-Stack Developer May 2025 – Jun 2025

- Developed a login-based Codeforces analytics dashboard with bar, pie, and heatmap charts visualizing ratings, tags, and submission activity, synced live via the Codeforces API for up-to-date stats.
- Enhanced practice targeting with a customizable problem sheet filterable by **40+ tags** and the full rating range, featuring random selection, bookmarking, and color-coded solved-status tracking for quick review.
- Built rating-based AI POTDs with MongoDB caching.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS

CryptoPulse *Website* *GitHub*
Full-Stack Developer Apr 2025 – May 2025

- Developed a dashboard that retrieves the **top 5 cryptocurrencies** in a single CoinGecko API call, featuring live price and rank tracking, auto-refresh, and a search function to add or remove coins.
- Implemented a secure login/signup system with JWT authentication, OTP-verified password recovery, and editable, persistent watchlists for tracking a personalized list of coins.
- **Tech Stack:** React.js, Node.js, Nodemailer

CERTIFICATIONS

- **Amazon** — ML Summer School Participant (2025)
- **IBM** — Hands-on Introduction to Linux Commands & Shell Scripting (Coursera)
- **Google** — Cybersecurity Professional Certificate (Coursera)
- **Google** — Gemini for Developers
- **Google** — Code Vipassana: AI Agents Workshop
- **Machine Learning Specialization**, Coursera
- **Full-Stack Web Development**, Udemy

POSITIONS OF RESPONSIBILITY

Sanskriti – The Cultural Committee, NIT Raipur
Cultural Executive Feb 2023 – Present

- Coordinated cultural events, performers, logistics, and cross-functional teams to support smooth execution and strengthen student participation.
